

# Slipper Instructions

## Materials:

1. Organza
2. Water soluble vilene
2. Embroidery threads
3. Scissors
4. Magic Tape

## Step 1

Using a single layer of water soluble vilene, hoop the water soluble vilene. Use a temporary adhesive to attach the required piece of organza to the vilene. Stitch out the pieces excluding the sole of slipper.

## Step 2

Remove water soluble vilene and dry out the pieces. Remove excess organza using a burning tool.

### Step 3

Hoop two layers of light weight tear away. Use a temporary adhesive to attach two layers of the required size satin. Stitch out the basting stitches (first part of design). These stitches will show in a different color. Use same color for basting stitches as for the rest of design. Cut away excess fabric.

### Step 4

Using magic tape, tape down the side pieces first. Then tape down the front piece and lastly tape down the back piece. Make sure all pieces are on or just inside the basting stitches. Stitch out the remainder of the design.
